HOW TO UNDERSTAND A CHECKLIST

When sports trading cards first became mainstream, things were simple. They were relatively limited. Nowadays, there are tens of thousands of sports trading cards on the market, with even more being added on a regular basis. That vast number is far too much for anyone to balance, especially if you're looking for specific inserts, players or special variations of your favorite cards. How can anyone be expected to keep up? Fortunately, checklists exist.

Checklists are essential for trading card collectors who want to ensure their collections are as well-rounded and complete as possible. Featuring information on the players, teams and numbering of cards (1-of-10 or 1-of-1, for example), checklists tell collectors everything they need to know about their cards.

To find checklists for your Panini America cards, you'll want to go to the checklist tab on our website. From there, you'll be able to select your desired information from a series of dropdown boxes, including the sport, the year, the brand and the program of your card. You can then select your card set (listed alphabetically) and your checklist will be available. You'll be able to find information on how many cards are in that particular set, the players included, their teams, their positions and the numbering, or rarity, of the cards.

Checklists are generally available for specific releases before the products hit the market, so you'll be able to get a sneak peek into what the sets include before you buy. They also are rarely changed after being published, so you can guarantee that the information is accurate. Collectors are also able to download an Excel file of all checklists for a specific program should they wish to have all of the information in once place instead of using the dropdown boxes on our website.

Sports trading cards make up one of the largest collectable industries in the world, with collectors across the planet hoping to get their hands on the best of the best to add to their personal collections. With all there is to offer, the information can get overwhelming. So, if you want to keep up with the ever-evolving world of sports trading cards — and ensure that your collections are top-notch — checklists are an absolute must.
